Dr. Mani L. Bhaumik

**Author :**

Dr. Mani Bhaumick is a world renowned Indian American Scientist in advanced theoretical physics, co-inventor of the high power excimer Laser which made the laser based LASIK eye surgery possible and also made him a millionaire. The University of California Los Angeles has established an Institute in his name (Mani. L. Bhaumick Institute for Theoretical Physics). He has researched and

made immense contributions in particle physics and Quantum Field theory. He has also made in depth study on India's ancient wisdom of Cosmic Consciousness and established great similarity between the two. In addition to numerous research papers and books, he produced the animated T.V series called 'Cosmic Quantum Ray' which is worldwide acclaimed. His life story itself is an example of rising from extreme poverty to a multimillionaire, his dream and belief that only knowledge can help him to become successful, and his conviction, determination to become successful. He is a Philanthropist and has established "The Mani Bhaumick Educational Foundation " in Bengal to provide Scholarships to underprivileged students for graduating in science, technology and medicine. Dr. Bhaumick is a graduate in mathematics and science from Scottish Church College in Calcutta and postgraduate (MSc) from the famous University of Calcutta under the mentorship of Prof. Satyendranath Bose, famous for formulating "The Bose-Einstein Statistics". He is a distinguished Alumni (PhD) of IIT (Kharagpur) and recipient of Padma Sree Award.

**About Book:**

'Code name God' by Dr. Mani Bhaumick is a very interesting, informative, illuminating and path breaking book on modern science and spirituality. He explains in a simple way modern scientific knowledge on energy particles and Quantum Field of energy as the all-pervading cosmic energy and close the gap between science and religion from the perspective of spirituality and the ultimate answer for the meaning of God. He explains the great similarity between modern particle physics – Quantum (energy) field and the understanding of the ultimate reality, the source of Universe as an all pervading (divine) energy by the Rishis of ancient India explained in Upanishad, and Vedas

Dr. Bhaumick has made the book interesting and inspiring by weaving his own autobiography of a poverty stricken childhood, his curiosity on the concept of God, his determination to acquire knowledge and become successful. Thus, the book is also a story of dreams, hard work, passion and determination to succeed. As a young barefoot child, he used to look at this star-studded night sky, and wonder 'is that God'? He narrates the poignant story of his childhood and his family due to extreme poverty and atrocities by the police as agents of the then British rulers of India as his father was a freedom fighter under the guidance of Mahatma Gandhi. He was privileged opportunity to be attending Mahatma Gandhi's camps and learn about Gandhiji's advocacy of nonviolence, spirituality, and belief in the power of mind and truth and Gandhiji's concept of religion and spirituality as a unifying factor. After India's independence he continued school education, still struggling because of poverty. But he had a passion for life, dreamt of becoming rich and successful through education, and hard work with conviction. The book is also a story of dreams, hard work, struggles and success, both in personal and professional life and career and in his search of God, the ultimate reality, source of Universe and linking Religion and Science. 'Code name God' is a fascinating, incredible story of rags to riches and is a very inspiring and motivational in addition to intellectually stimulating and providing knowledge and wisdom.

**“Prayer is the most powerful form of energy that the mind can ever produce. In prayer, we augment our finite minds with the infinite source of all energy. It cannot happen that anyone can pray, even for a single moment without producing some good result.”**

*- Alexis Carrel, a Nobel Prize winner for medicine*

**“Feel, my children, feel for the poor, the ignorant, the downtrodden.”**

*- Swami Vivekananda*

**Concern for man and his fate must always form the chief interest for all technical endeavours..... Never forget this in the midst of your diagrams and equations.’**

*- Albert Einstein (1879-1955)*
